Community
Sites/locations

Eastern Health Catchment

Municipalities: *Boroondara, Manningham, Yarra Ranges, Knox, Whitehorse*
Covering: *2,817km area*
Population: *773,992*

Eastern Health at a Glance*

Key Metrics:

- Services covering birth to death
- Operating Budget: \$1.01B
- Costed per minute: \$1931
- Staff (incl. volunteers): 10,265
- Beds 1,508
- Care Episodes: 1.33M

*July 2017 - June 2018

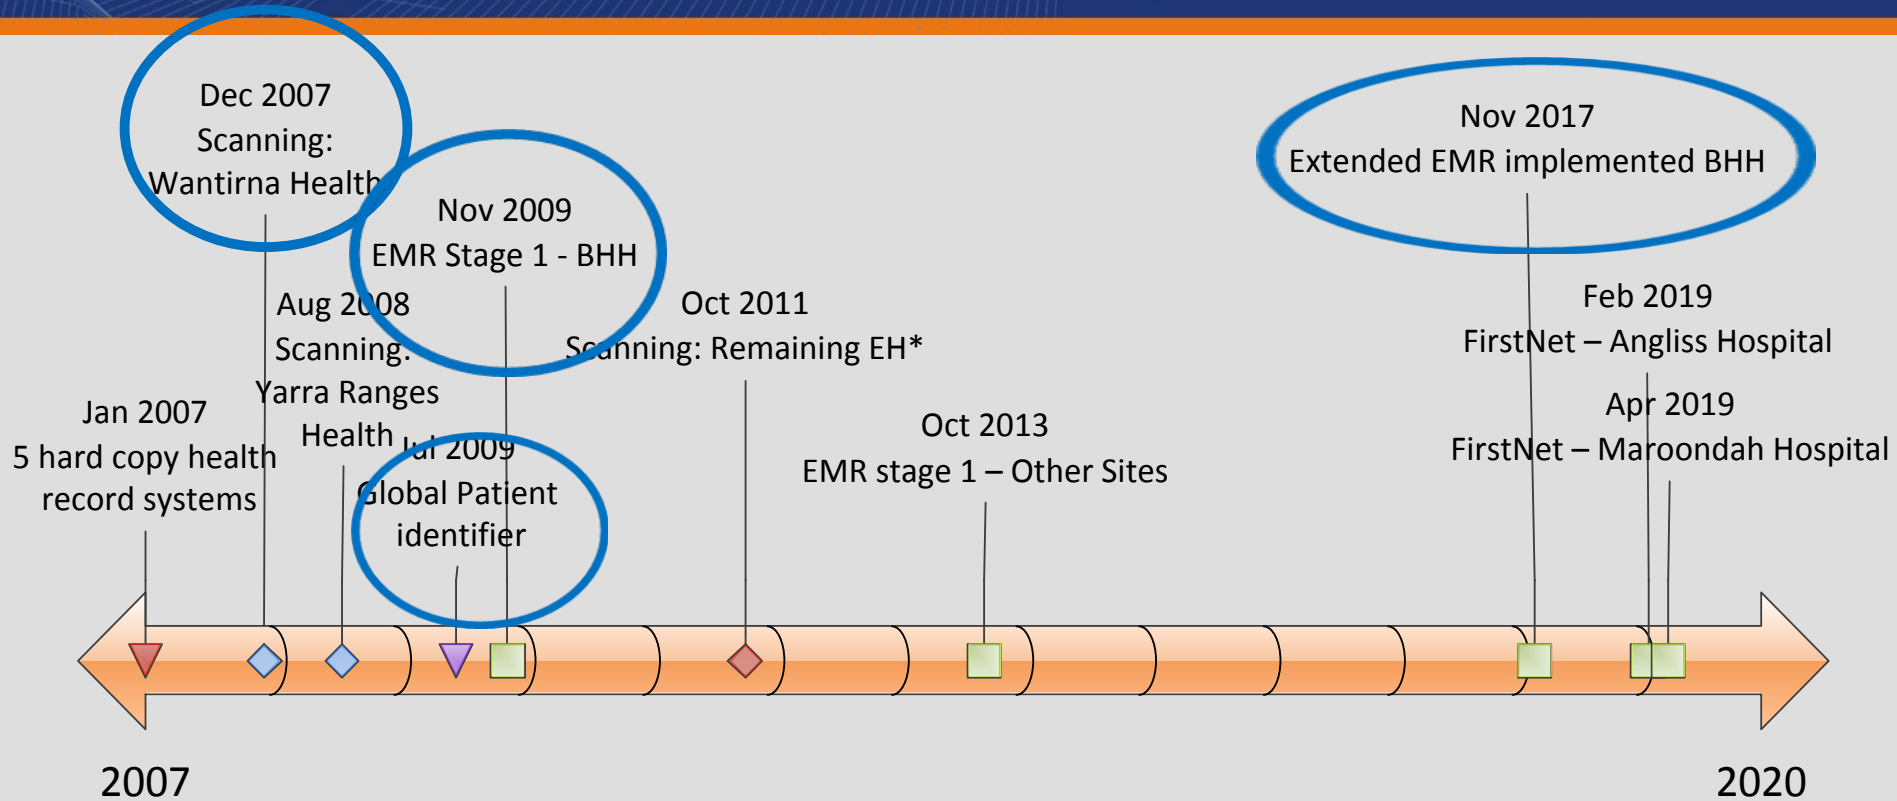

Today's Health Records Landscape

- Paper
- Scanned
- 20+ key clinical systems (including)
 - *Cerner
 - *AutumnCare
 - *HIMS
 - *CMI
 - *Healthtrak
 - *HOMER
 - *BOS
 - *Bookwise
 - *Endobase
 - *IRIS
 - *Auslab
 - *Kestral
 - *Merlin
 - *Fluvax
 - *Medical Director

Started with a best of breed approach NOW single system due to integration challenges

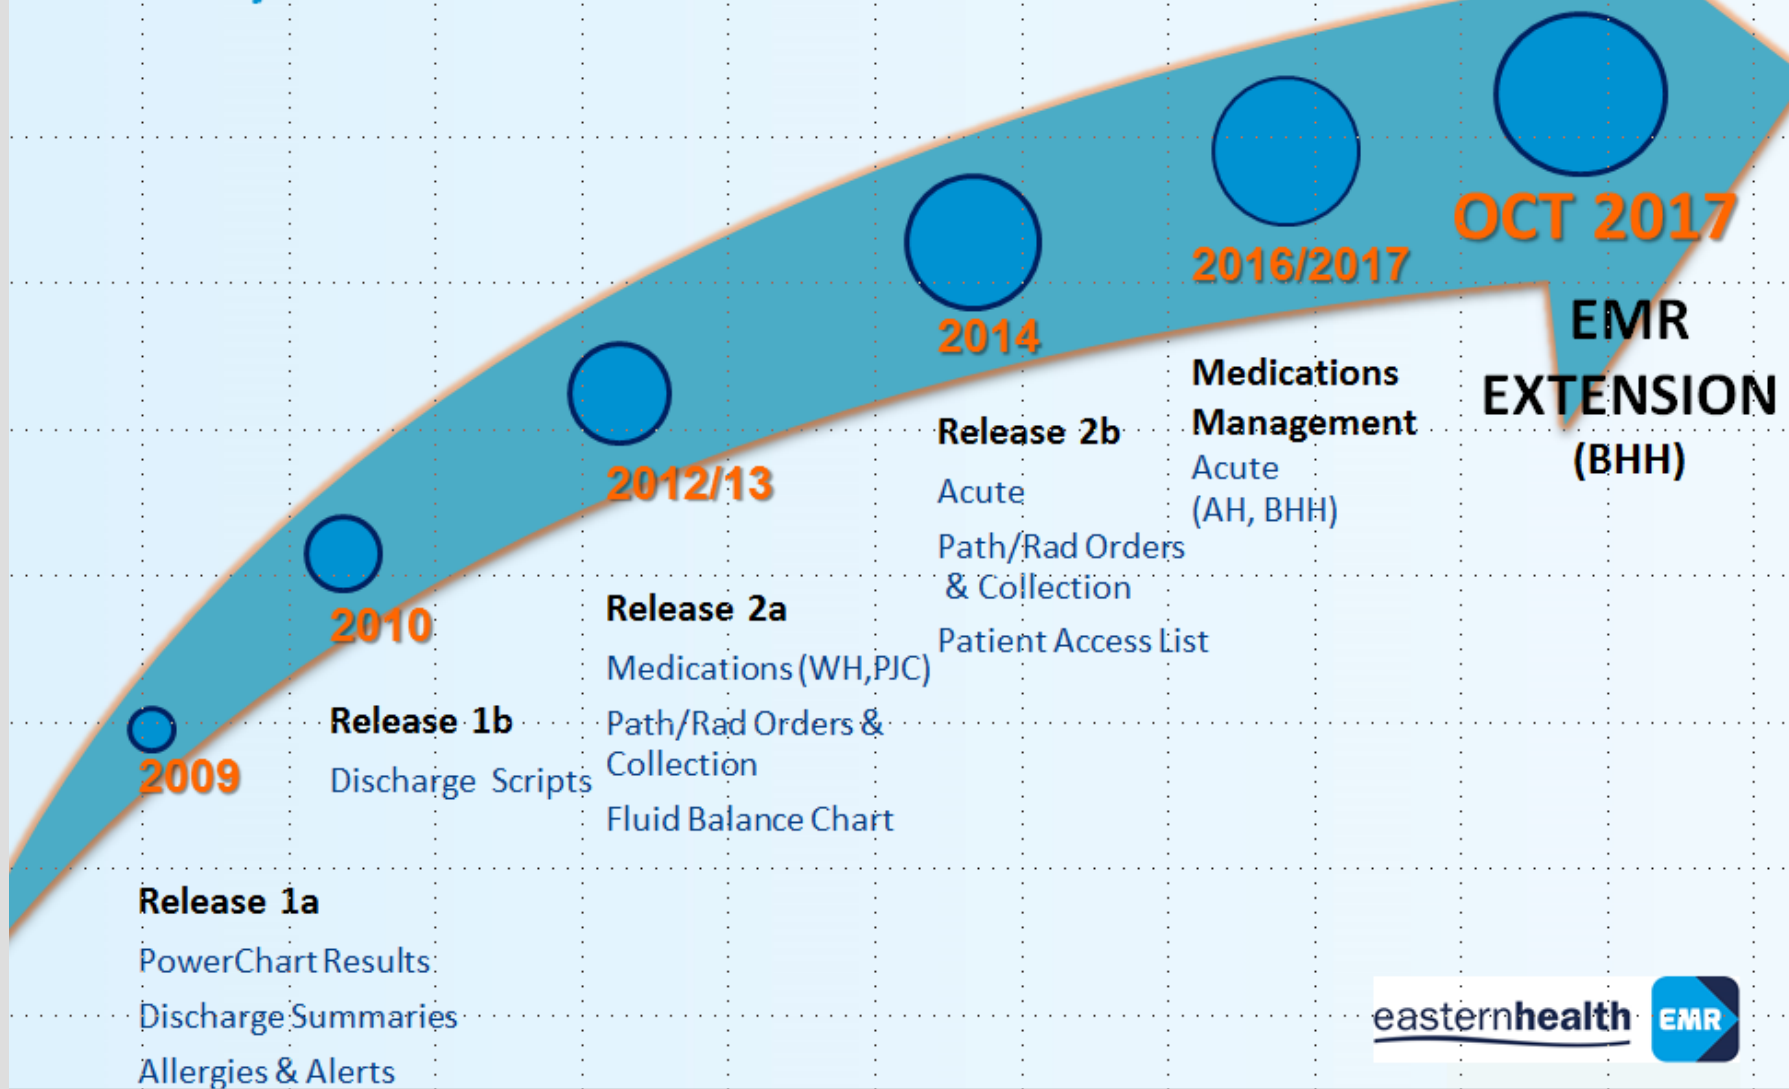

Timeline for Adoption

Eastern Health's EMR Journey

January 2009-October 2017

- Completed in September 2014
- Vision: **To create a technologically advanced healthcare facility in Box Hill**

EMR Suite Implemented at Box Hill Hospital (Nov 2017)

EMR EXTENSION INTRODUCED

- ICU solution (Critical Care)
- Emergency solution (FirstNet)
- Surgery solution (SurgiNet)
- Anaesthesia Management
- Complex Medications & IVs
- Clinical Documentation
- Positive Patient Identification (PPID)
- Device Integration
- Specimen Collection
- Lighthouse (Sepsis, falls and pressure ulcers)

Device Integration

Transmitting clinical data directly into the Electronic Medical Record.

- Spot Check Monitors (145)
- Bedside Medical Devices
 - Fixed monitors (172)
 - Anaesthetic Machines (16)
 - Ventilators (30)
 - Cardiac Output Monitors (4)
- ECG Machines (26)

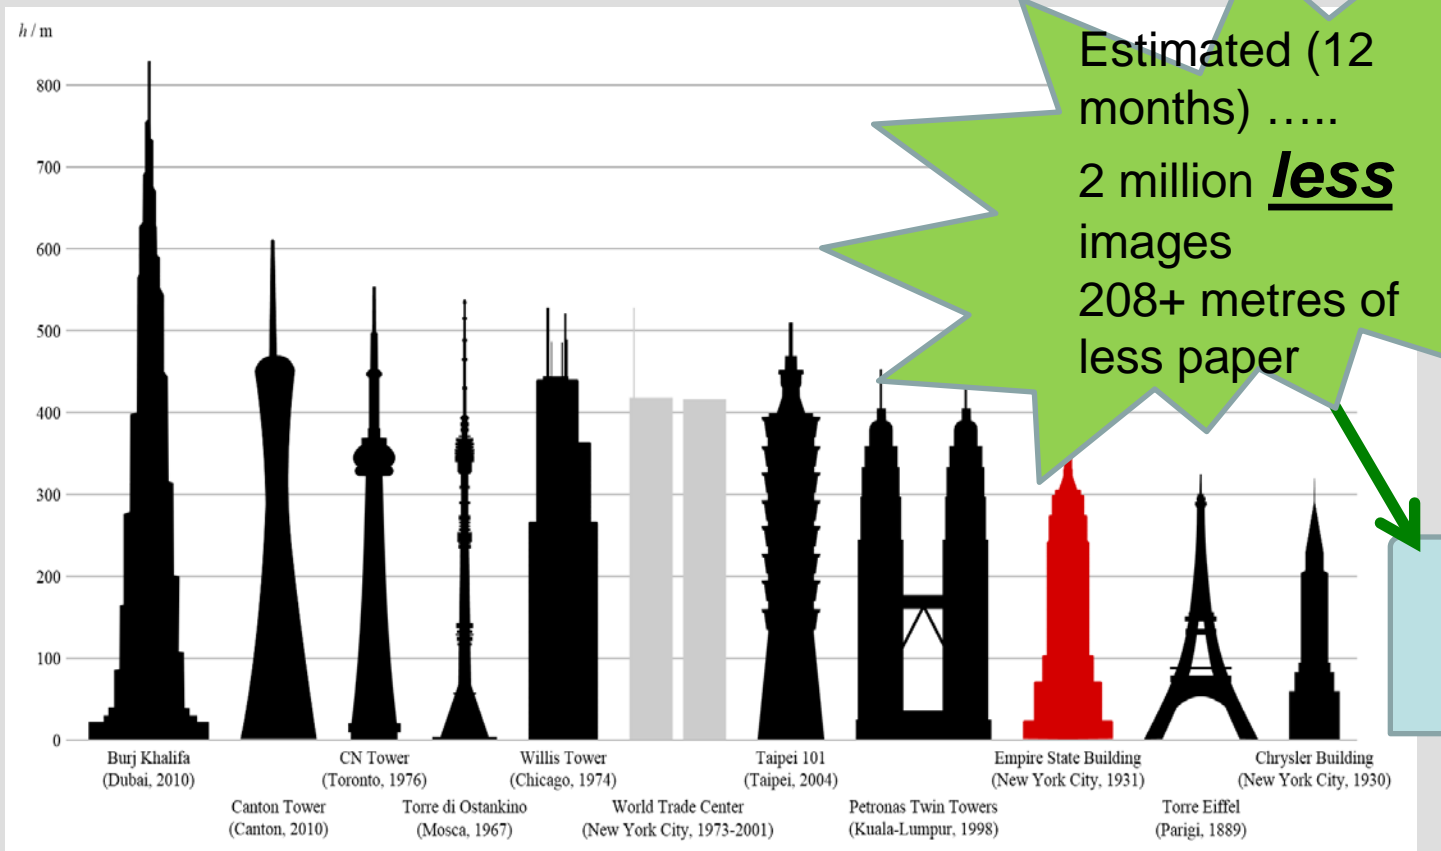

EMR Daily Usage - Average

- 3,141 EMR logins
- 2,291 EMR users a day
- 11,749 medications administered
- 12,203 orders signed
- 39,484 times medication records is opened
- 47,393 time a patient chart is opened

The Good, the Bad & the Ugly!

Sustainability - reduction in scanning

The Good, the Bad & the Ugly!

- Real time data entry
- Real time data access
- Auditability (legal health record)
- Electronic transfer of information (My Health Record)
- Legibility →

Electronic Medical Record

A comprehensive electronic patient record which is up to date, easy to read and accessible instantly by the patient's healthcare team

Patient benefits

Better care
co-ordination and outcomes

Secure and private information

Less clinical and
medication errors

Improved communication

Early warning systems and alerts
for at-risk patients

Staff benefits

Accurate patient record with
'no gaps'

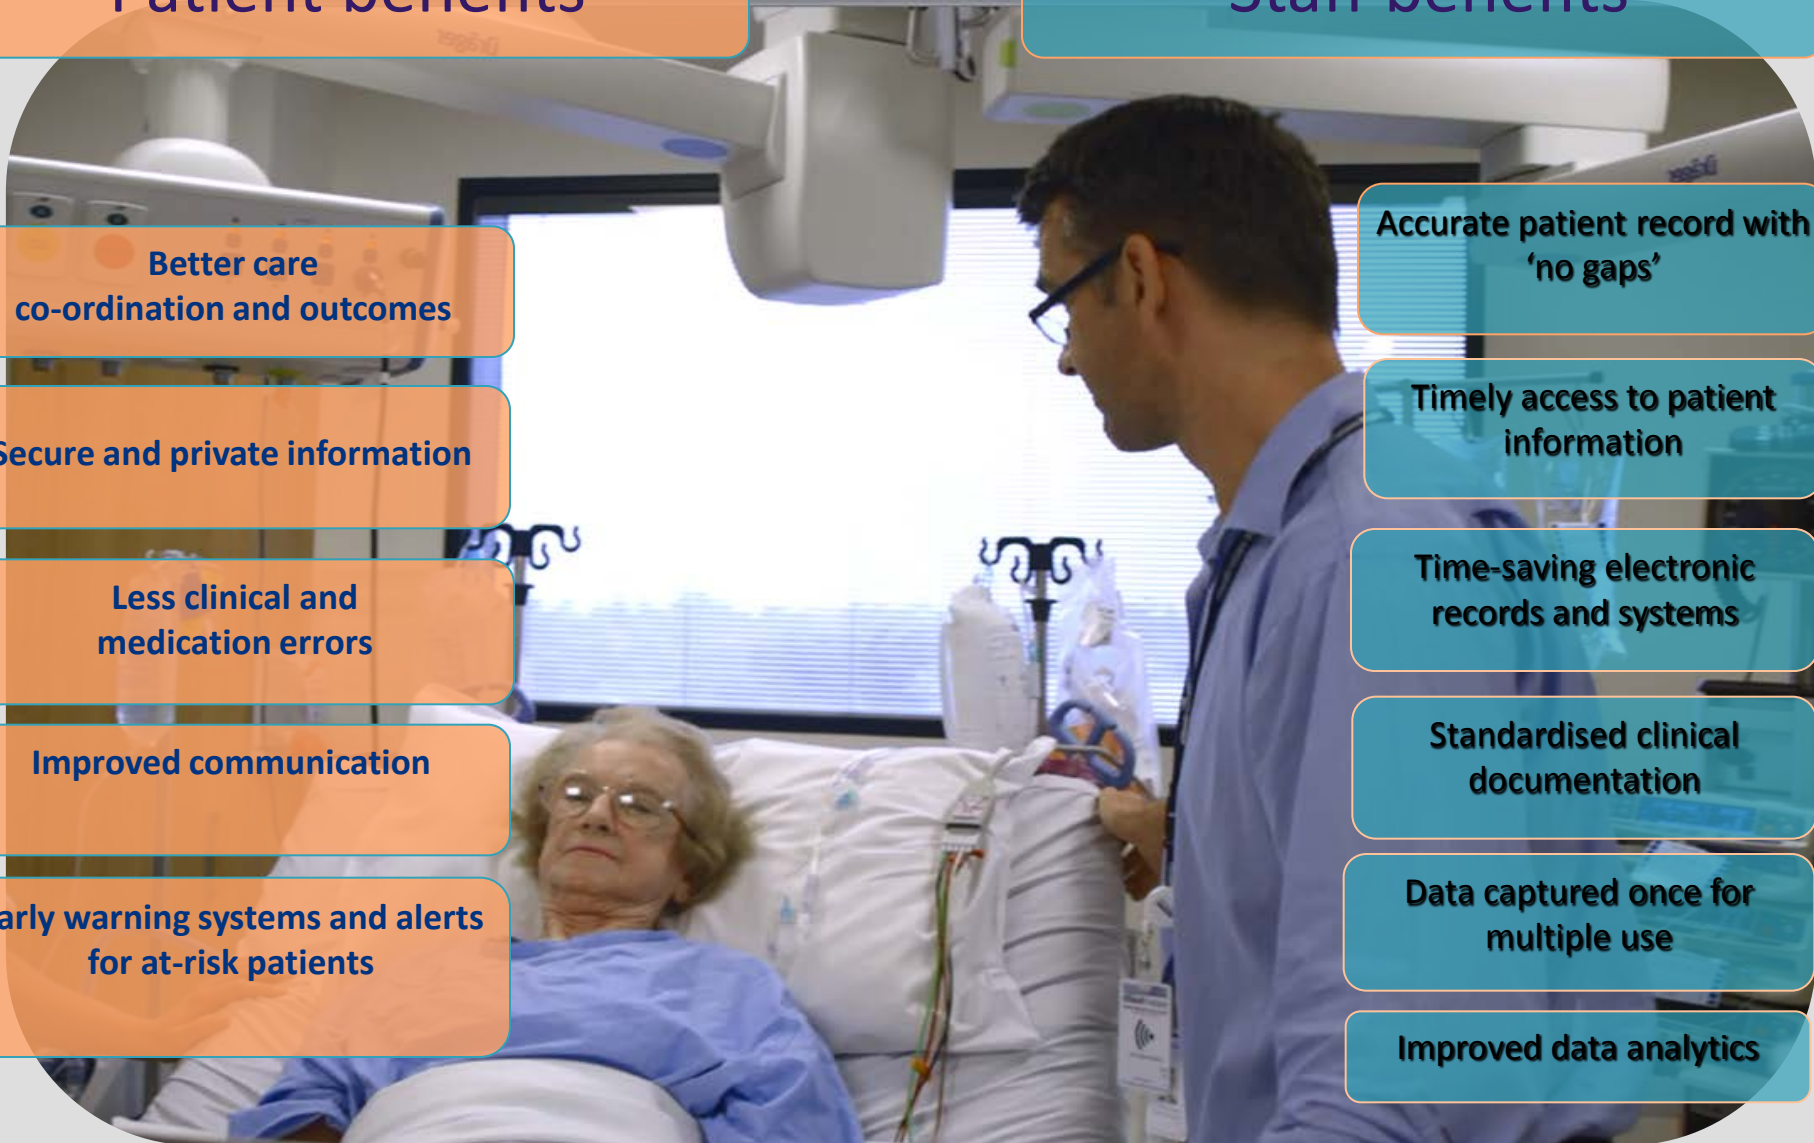

Timely access to patient
information

Time-saving electronic
records and systems

Standardised clinical
documentation

Data captured once for
multiple use

Improved data analytics

The Good, the Bad & the Ugly

- High degree of managing knowledge gaps
- Skilled staffing availability – an industry problem
- Can be difficult to find information
- Resourcing and funding to maintain
- Alignment and priority demand – changes to system
- Updating standards to reflect environment

The Good, the Bad & the Ugly

- Cybersecurity increased investment and monitoring (across all systems)

OAIC – 2018-2019 - 950 officially reported data breaches in Australia

#TECHNOLOGY NEWS SEPTEMBER 25, 2014 / 4:25 AM / 3 YEARS AGO
Your medical record is worth more to hackers than your credit card

HealthIT Security

More Hospitals Affected by Healthcare Ransomware

Healthcare ransomware attacks health systems, although patients

CSO
FROM IDG

Black market medical record prices drop to under \$10, criminals switch to ransomware

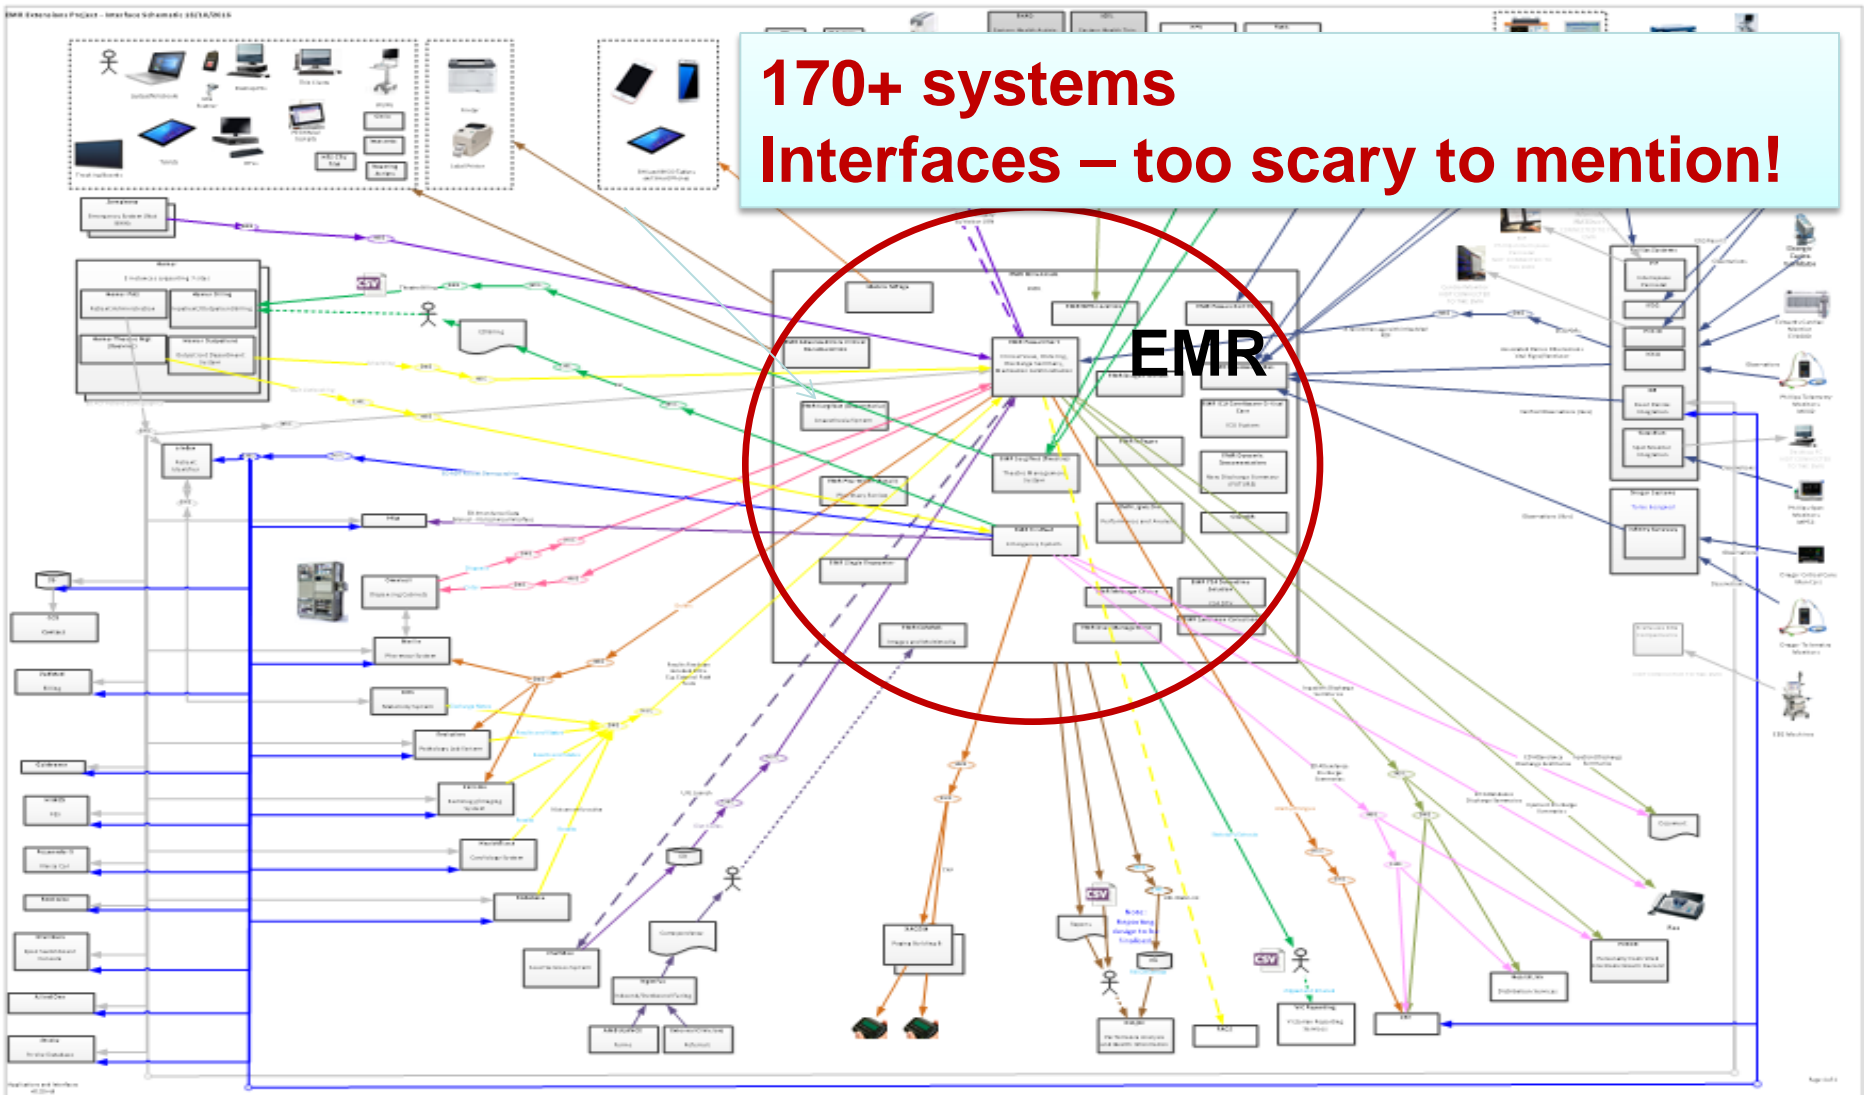

The black market value of stolen medical records dropped dramatically this year

U.S. EDITION
RANSOMWARE HACKERS ARE COMING FOR YOUR HEALTH RECORDS
BY LILLIAN ABLON AND MARY FRIEDBERG ON 4/9/16 AT 10:00 AM
Newsweek

The Good, the Bad & the Ugly

- Difficulty creating consistency across sites – different levels of functionality
- Embedding into organisational processes (13 months – clinical agreement on process)
- Governance – who is responsible for what?
- Managing and monitoring access to system
- Integration requirements

The Good, the Bad & the Ugly

The Good, the Bad & the Ugly

- Data protection – organisational culture change (Transferring of information)
- Hybrid record – organisation risk
- Not tackled archiving or destruction
- Managing downtime and recovery

Reflections

Major Transformation

Challenging and Complex

Requires Leadership from the top

Clinical Engagement from the start

Organisational Ownership

Implementation is just the start ...

Next Steps

- Leverage functionality & capability
- Leverage analytics capability – improvement patient care and research
- Business cases – 4 in train additional EMR functionality
- Patient Administration System (second attempt!)

Next Steps: PAS System Replacement

- HOMER – end of life
- EMR before PAS replacement (Mistake!)
- Challenges
 - Integration
 - Downstream systems (42 systems)
 - Medical device integration (393 devices)
 - Replacement of integration engine (jcaps)
 - Testing effort (9 months)

Implications for Health Record Managers

- Change management: paper → digital
- Industry changes very rapid - reskilling & rethinking
- Adaptive and “bold”
- Standards – evolving environment, new, variable capability
- Restructure – new focus & new environment
- Standards – evolving environment, new, variable capability

Summary

- Hybrid record environment – clinical risk
- Challenging journey
- Changed the role of health record managers – less direct involvement – data quality and protection focus
- Now will be the time to leverage more of the benefits –patient care and service delivery improvements
- *Great opportunities ahead.....*
